DETAILED ACTION

The rejection under 35 U.S.C. 112, first paragraph, has been overcome by applicant's arguments and amendment.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-31 & 33-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims still do not properly set forth the essential metes and bounds of the instant invention- applicant's use of "disposing the cells" and the failure to distinguish between the media employed are the culprits here. Applicant's claims are in much better form, the only remaining issue is the proper claiming of the medium exchange that causes the formation of the construct. The examiner appreciates the difficult nature of claiming a method of this type. It is suggested that, as is indicated on page 11 of the instant specification, applicant claim that the cells are initialed grown in a growth culture medium and then indicate that that medium is replaced with eth differentiation medium and that the claims make it clear what the difference between those two media is.

Perhaps applicant could amend claim 19 & 40 in the following manner:

“providing fibroblast cells in a growth medium on the substrate without disposing the cells within an exogenous scaffold material, wherein at least some of the cells are in contact with the anchors and attach thereto such that the fibroblasts grow to confluency; and

replacing the growth medium with a differentiation medium which induces the fibroblasts to detach from the substrate... construct wherein the differentiation medium is a growth medium which {critical element to be inserted here}

It is unclear what exactly is essential for the differentiation medium and the examiner feels that that essential element (s) must be claimed in order for the claims to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date

of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
